

# MAXIMIZE YOUR EQUIPMENT INVESTMENT WITH PLANNED MAINTENANCE

Today, most customers either perform their own maintenance or have the dealer do it for them. The Honnen Shield Programs provide planned maintenance agreements which can make your operation more productive and increase profits. Unlike other maintenance programs, the Honnen Shield Programs offer more than just a fluid and filter change, they deliver on the uptime and productivity that you, the customer, have come to expect, and at the same time reduce ownership costs.

## PARTNERSHIP IS THE KEY

Our Shield Programs link you, the customer, and Honnen Equipment with a maintenance strategy aimed at creating a partnership to extend machine life and productivity. Monitoring machine performance and operating conditions ensures visibility to any issue before it leads to a catastrophic failure.

## TOTAL FLEXIBILITY IS THE GOAL

Any of the Shield Programs can be customized for condition based maintenance centered on machine health, or remain on manufacturers recommended maintenance. Fluid analysis is an integral part of the condition based maintenance philosophy. Consistent oil analysis gives visibility to abnormal and critical parameters which indicate wear of components or external contamination.

# HONNEN SHIELD PROGRAMS

## HONNEN SHIELD BASIC PROGRAM

- Maintenance kits are shipped to the customer with all the filters and fluid testing kits needed for a prescribed interval.
- Customer performs own preventative maintenance.
- Fluid Analysis results are sent to both the customer and Honnen for greater visibility to machine health and maintenance.

## HONNEN SHIELD PLUS PROGRAM

- Like the Shield Basic Program, but Honnen Equipment technicians perform the preventative maintenance, which can be done onsite or in our shop.
- Maintenance is scheduled with the customer to minimize the impact of downtime.
- Honnen Equipment assists in interval tracking to ensure your preventative maintenance needs are taken care of.

## HONNEN SHIELD ULTIMATE PROGRAM

- Total machine support package which includes all the benefits of the Basic and Plus plans above.
- Maintenance and repairs are scheduled with the customer to minimize the impact of downtime.
- Honnen Equipment performs preventative maintenance and specified repairs based on the hours you specify for the length of the agreement.
